Biomes - showcases each major biome, its characteristics and species of plants and animals. Populations - discussions population growth curves, population pyramids and limits to growth.

Ecology
This biome consists mainly of mosses, grasses, sedges, lichens and some shrubs. Seasonal thawing of the frozen soil occurs only up-to a few centimetres depth, which permits the growth of shallow rooted plants.

8 Major Biomes of the World | Ecology
And, right over here, we have depicted the major types of land ecosystems on our planet and where you might find them. And these different types of land ecosystems, these are called biomes. Biomes. And as you can see from this diagram, tropical forests, you can find it right over here. This is the Amazon rain forest. You can find it in Africa.
