Your Kinetico water system contains resin beads, which hold sodium ions. When hard water passes through the resin beads (Fig. 3) inside a Kinetico water system, the beads attract and hold the calcium and magnesium ions in exchange for sodium. After this ion exchange process, the water leaving your Kinetico water system is soft.

b: A non-return valve on the water main supply to the softener. If using a Kinetico supplied installation kit, a non-return valve is built into the Inlet Tee. c: A by-pass assembly which enables the softener to be isolated from the water supply for maintenance and service. This also maintains the water supply when the system is disconnected.
