Mac OS X 10.6 Snow Leopard was the first version of OS X to be built exclusively for Intel Macs, and the final release with 32-bit Intel Mac support. The name was intended to signal its status as an iteration of Leopard, focusing on technical and performance improvements rather than user-facing features; indeed it was explicitly branded to developers as being a 'no new features' release. [40]

Mac OS X Snow Leopard vs. Mac OS X Lion | Network World
As a VISTA-phobe Mac switcher, no one did a better job than Pogue at making me feel at home with Leopard. He's done it again for Snow Leopard -- where eye candy was sparse, but getting the OS ready for the future was the driving force, as well as much needed updates of the standard apps to enhance performance.
