the unique properties of materials manufactured or engineered at this level that has led supporters of nanotechnology to claim it could be used to benefit mankind in many ways, from treating cancer to preventing pollution.

Chemical Engineering: The Rise of Nanotechnology

Access Free Nanotechnology In Chemical Engineering

With our long history in heterogeneous catalysis and surface science, Michigan chemical engineers have been using nanotechnology well before it became a buzzword. New tools allow even better control of nanoparticle growth, shape and properties – and better characterization of the final products.
