Fair Information Practice Principles. (1) The Collection Limitation Principle. There should be limits to the collection of personal data and any such data should be obtained by lawful and fair means and, where appropriate, with the knowledge or consent of the data subject. (2) The Data Quality Principle. Personal data should be relevant to the purposes for which they are to be used and, to the extent necessary for those purposes, should be accurate, complete and kept up-to-date.

Fair Information Practice Principles

Make Data and Information Available (with appropriate restrictions): Sharing data and information is the key purpose of information management, so any IM program should keep this as a core principle. However, not everyone should have access to everything, so clearly lay out who should have access, and ensure the technology you use supports these policies.
