03/07/2017. The day has arrived, and that's the point in time when Visual Studio 2017's features set is somewhat cast in stone and makes its public debut, ready for release to the Web and for use in production development environments. Microsoft announced a few weeks ago that the day would be marked by two days of online keynote coverage of news and updated features throughout the suite's various programming languages and frameworks and toolings, and that's happening as we post this news.
