## **Trends - Investopedia**

Bollinger Bands make it easy to buy low and sell high. Traders will open a position when the trend line is nearing the bottom of the Bollinger Band range. Traders will need to close a position when the trend line reaches the top of the range. Rules for Bollinger Band Bounce Trading Strategy \*To make it simple, I am going to use the same (GBPUSD 4-hour chart) example for each of these rules.

## **How to Use Bollinger Band Indicators - Trading Strategy Guides**

Since the MACD has no upper or lower limit, traders do not think of using the tool as an overbought/oversold indicator. To identify when a stock has entered the overbought/oversold territory, look for a large distance between the fast and slow lines of the indicator.

2 trend indicators (the ADX and the Bollinger Bands). Again, the purpose of both indicators is the same: identifying trend strength. You can see that during a trend, the Bollinger Bands move down and price moves close to the outer Bands. At the same time, the ADX is high and rising which also confirms a trend.

### **How To Combine The Best Indicators And Avoid Wrong Signals**

In a downtrend, you can short near the upper Bollinger Band. When the Bollinger Bands is in a squeeze, it signals the market is “ready” to breakout. You can use the 20-period moving average to time your entries in trending market. You can use Bollinger Bands and RSI divergence to find high probability reversal trades.
